Linux System Programming

Task 2:

- Use command-line tools to perform the following tasks in Linux:
- Create a directory structure /tmp/myfiles and navigate into it.
- Create three text files, write sample content in them, and list the files in the directory.
- Change the permissions of one file to read-only for the group.

Output:

```
student@student:/tmp/myfiles
student@student: ~/tmp/myfiles
student@student: ~/25SUB5936...
student@student: ~/Desktop/25...
