

Name - Saikat Sheet
Batch - 25SUB5936_Linux System Programming
ID - 68500

Task 3: Write a Bash script that:

- Declares two variables, one string, and one integer.
- Includes an if-else statement that prints a message based on the value of the integer.

Output:

```
student@student: ~/25SUB5936_U21/Assignments/Day25
student@student: ~/tmp/myfiles$ cd ..
student@student: ~/tmp$ cd
student@student: $ cd 25SUB5936_U21/
student@student: ~/25SUB5936_U21$ cd Assignments/Day25/
student@student: ~/25SUB5936_U21/Assignments/Day25$ ./Task_3.sh
-bash: ./Task_3.sh: Permission denied
student@student: ~/25SUB5936_U21/Assignments/Day25$ chmod u+x Task_3.sh
student@student: ~/25SUB5936_U21/Assignments/Day25$ ./Task_3.sh
Hello Saikat, you passed with a score of 85!
student@student: ~/25SUB5936_U21/Assignments/Day25$
```

Code:

```
#!/bin/bash
```

```
user_name="Saikat"
```

```
user_score=85
```

```
if [ $user_score -ge 70 ]; then
```

```
    echo "Hello $user_name, you passed with a score of $user_score!"
```

```
else
```

```
    echo "Hello $user_name, you did not meet the required score."
```

```
fi
```
